See above an example of **price fluctuations of Raw Materials** and **yarns** used to make a **plain white bedsheet** (50/50 PC - 130gsm - 180x300cm) for **Textile Rental Industry** and the **impact on the price of the finished product**. Thanks to our huge database with our correspondants in Pakistan, India, China, Etc, we can customize and update you every month this kind of chart **depending on your products** (Bed linen, workwear, Fashion item, Etc) and **where your products are made**. We can add other parameters like **wages fluctuation**, inflation, Etc.

In this specific case, we can notice there is no direct link between Raw materials price and Yarn price. It depends more on supply and demand and specially about yarn stock level. **But there is a direct impact, between yarn price and bedsheet price.**
